## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Group I, claims 1-9 in Paper No. 8 is acknowledged. The traversal is on the ground(s) that the claims as now amended should be examined together since they are subject to 35 USC 371. This is not found persuasive because as noted in the previous office action, the invention lacks a special technical feature since the cited prior art reads right on the invention.

This application contains claims 29-38 are drawn to an invention nonelected with traverse in Paper No. 8. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Since claims 29-38 are drawn to non-elected subject matter since they are drawn to methods and not the composition elected, they are withdrawn from further consideration by the examiner.

The requirement is still deemed proper and is therefore made FINAL.

Claims 21-28 are presented for examination.

### ***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 21-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Dan Bensky et al., Hson-Mou Chang et al., Chu et al., CN 1047806 or EP 441278.

Applicant argues that the references do not expressly state that the extracts have a molecular weight of at least 100 kilodaltons but this is inherent since the extracts come from the same plant. The references teach using standard techniques for purification and thus the extracts will have the same molecular weight as in applicant's invention. Applicant has not established that the products in the references and that of the instant claims are allegedly distinct from each other. Chu states that a partially purified fraction is 20-25 kD, not the whole fraction.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dan Bensky et al., Hson-Mou Chang et al., Chu et al., CN 1047806 or EP 441278.

The teachings of the references are above. The claims are obvious since the extract is purified by known techniques. It would clearly have been within the purview of the skilled artisan to purify the claimed extract using standard biochemical extraction techniques for plants to yield the claimed invention.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
